EXPERIENCE

Software Engineer II

Samsung R&D Institute Bangladesh

Oct 2024– Ongoing Dhaka, Bangladesh

- Optimized core ultrasound 3D engine performance.
- Improved system efficiency through targeted performance tuning.
- Applied advanced optimization techniques to medical imaging pipeline.

Software Engineer II

Samsung R&D Institute Bangladesh

May 2019 – Oct 2024 Dhaka, Bangladesh

- iOS Developer with Expertise in Mission-Critical Push-To-Talk (MCPTT) System.
- Responsible for the development and maintenance of features for the project, utilizing Swift UI and UI Kit to deliver a user-friendly and efficient iOS app.
- Developed some APIs that seamlessly bridge the gap between client and server/framework, ensuring smooth data flow.

INTERESTS

Data Structures Algorithms Research & Development
Problem Solving Machine Learning Software Architecture

PROGRAMMING SKILLS

Swift C C++ Python Objective-C

ACQUAINTED WITH

AI Git Latex SQLite Gerrit Pandas REST APIs
SIP/SRTP

VOLUNTEER EXPERIENCE

Problem Setter & Judge

Bangladesh University of Business and Technology (BUBT)

Apr 2017 – Mar 2019 Dhaka, Bangladesh

- Planning & managing Intra-university programming contests with writing & collecting problem sets.
- Training & guiding junior competitive programmers.

Problem Setter & Judge

Samsung RD Institute Bangladesh

2022 – 2024 Dhaka, Bangladesh

- Member of the problem setter and judge panel of SRBD Code Contest (2022, 2023).

EDUCATION

Bachelor of Science in Computer Science

Bangladesh University of Business and Technology (BUBT)

Feb 2015 – Apr 2019 Dhaka, Bangladesh

- CGPA - 3.55 / 4.00

THESIS / PROJECTS

Security of Blockchain in the Internet of Things: A Comprehensive Survey

This paper provides a concise overview of Blockchain security threats, enhancement solutions, and key security algorithms (SHA-256, RSA, 3DES, etc.). It also covers the security aspects of devices, databases, and transactions in Blockchain, with a focus on addressing the challenges of Internet of Things security and privacy.

Data Science Projects

I possess experience in the development of various AI and other projects, including a Suicide Note Detector, a Car Sales Prediction system, and a Heart Disease Prediction model.

BUBT News Portal

I developed a web-based news portal to provide students with information about upcoming programming contests, events, university news, etc. Utilized WordPress and AMPPS.

ACHIEVEMENTS & CERTIFICATIONS

Samsung Awards & Recognition

Recognized 6 times for performance excellence, including Icon of the Month (×2), Appreciation for Contribution/Excellence (×3), and Outstanding Collaborator (×1). certified Samsung SWC Professional.

ICPC - International Collegiate Programming Contest

Participated in ICPC Dhaka Regional 2 times and placed among the top 65 (BUBT_Extremis) out of 300 teams.

National Programming Contest

Participated in more than 10 contests & conquered highest rank 19 (BUBT), 39 (BUBT_Extremis) and Participated in NCPC (National Collegiate Programming Contest) 2 times.

Intra University Programming Contest

Total 4 times champion at BUBT Intra university programming contest.

Problem Solve

Solved around 2000+ problems in various online judges.
